

THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

Calluna vulgaris 'Bollan'

has been registered by

STEN-BÖRJE SÖRENSSON
Hönö, Sweden.

REGISTRAR _____ DATE _____
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers: usually solitary on short side-shoots, lilac.
Young stems deep crimson;
leaves pale yellow-green, some developing very pale creamy tips; to 2mm long,
not appressed to shoot but spreading at angle of about 45°, so shoots are moss-like;
young side-shoots not branching.

Origins: chance seedling found in 2005 by Frideborg Sörensson in her garden in Hönö.
Named by Sten-Börje Sörensson: "Bollan" was his mother's nickname.

Cultivar registration number: C.2011:07
