

THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

Calluna vulgaris 'Ally'

has been registered by

STEN-BÖRJE SÖRENSSON
Hönö, Sweden.

REGISTRAR _____ DATE _____
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers: solitary on side-shoots, buds pink (H8), opening shell-pink (H16);
calyx lobes about 3.5mm long, broad; corolla lobes shorter, c.3mm.
Foliage: individual leaves minute (less than 1mm long) mid-green, glabrous;
very tightly appressed to short and slender side-shoots (about 1cm long, not more than 1mm across),
often not branched – the effect is of a mossy shrub;
shoots tips paler, yellow-green when young.

Origins: a seedling selected by Sten-Börje Sörensson in 2006.
Named by Sten-Börje Sörensson after his mother: Ally was her second name.

Cultivar registration number: C.2011:08
