

# THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

*Calluna vulgaris* 'Gina'

has been registered by

**KURT KRAMER**  
Edeweicht, Germany.

REGISTRAR \_\_\_\_\_ DATE \_\_\_\_\_  
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers: H7 (rose-pink), bud-flowering (Knospenblüher); buds 5mm long, to 2mm diameter;  
August–December.

Foliage: light green.

Habit: upright, after 3 years to 30cm tall × 25cm across (pruned).

Origins: sport on 'Pink Alicia' found by Kay Müssig, Miltenberg,  
in autumn 2003.

Bud colour between 'Pink Alicia' and 'Rosita'.  
(Recorded as 'Sina' in The Heather Society database in 2011.)

**Cultivar registration number: C.2012:02**
