

THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

***Daboecia* × *scotica* ‘Thumbellina’**

— named by David Edge —

has been registered by

JULIAN FITZ-EARLE
West Wickham, UK.

REGISTRAR _____ DATE _____
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers: heliotrope (H12); corolla small (less than 10mm) with a few scattered gland-tipped hairs; ovary with prominent gland-tipped hairs, very obvious when corolla falls; June–July.

Foliage: dark, glossy green; leaves to c. 6mm.

Habit: low-growing, compact; after 3 years, 15cm tall, 10cm across.

Origins: self-sown seedling in Forest Edge Nursery (Wimborne, Dorset); parentage unknown but believed to be from *D.* × *scotica* cultivars on nursery.

Cultivar registration number: D.2009:01
