

THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

Erica manipuliflora ‘Swindon Surprise’

has been registered by

RICHARD CANOVAN
Toothill, Swindon, Wiltshire, UK.

REGISTRAR _____ DATE _____
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers pale pink “with a hint of coral”; corolla translucent; sepals pearly white;
anthers dark maroon; style strongly exerted;
pedicels dusky red; late July–November .

Origins: chance seedling before 2005, most probably from ‘Toothill Mustard’;
found by R. Canovan in his garden.

Compared with AWJ5, this clone flowers six weeks earlier;
its corolla is smaller, more ovate, and constricted at the mouth;
its pedicels shorter; sepals more shiny.

Cultivar registration number: E.2010:14
