

# THE HEATHER SOCIETY

acting as

INTERNATIONAL CULTIVAR REGISTRATION AUTHORITY

certifies that

***Erica cinerea* ‘Sandford Heritage’**

has been registered by

**DR JOHN F. WRIGHT**  
Sandford, Dorset.

REGISTRAR *E. Charles Nelson* DATE *5 October 2011*  
on behalf of The Heather Society

Its characteristics at the time of registration were

Flowers densely clustered in fascicles on short lateral shoots;  
corolla small, obovoid, elongated, to 5mm long, less than 1.5mm across towards base;  
sepals up to 8: stamens absent; style malformed and emergent.

Foliage: dark green.

Origins: found on 28 September 2009 on Sandford Heath (SY 93727 90374),  
near Wareham, Dorset, by Dr J. F. Wright;  
the original plant is still alive at that place, 2 October 2011.

This is an abnormal plant and the characters have been retained in cultivation.

Named in recognition of SANDFORD HERITAGE,  
a Heritage Lottery Fund project (2011–2012) that enables the people of  
Sandford to discover their local history and wildlife.

**Cultivar registration number: E.2011:02**
